

OOP Lab Project

TITLE: SNAKES AND LADDERS BOARD GAME

Group Members:

1. Mahaad Akbar - 094
2. Husnain - 012
3. Muhammad Ahsan - 101
4. Abdul Wasay Rais - 067

OUTLINE:

We have chosen to design a snakes and ladders board game for 2-4 players, with a selection of different boards to choose from. We will look to incorporate the following topics:

1. All 4 OOP Pillars of Encapsulation, Inheritance, Polymorphism, and Abstraction.
2. A Graphical User Interface using the Java Swing library.
3. Exception Handling to manage any run time errors safely.
4. Java Database Connectivity will be used to provide data persistence to store data for all the boards as well as player names and history.
